

Dear Parents/Carers,

Well what another busy (and wet) week we've had. All the children have had great fun participating in wildtribe activities and did a great job of collaborative working and problem solving.

The sun finally decided to show it's face towards the end of the week and the children have loved playing outside without the need for waterproofs! Fingers crossed it continues and we will need to remind them about sunhats and raincoats.

As you will be aware, emails have all moved over to Andaras emails. If you send an email to the old Lewannick email address you will get a message with the person's new email address. An email from the office will be coming soon with the updated email addresses on. If you do not receive a reply, please email Mrs Symmons and she will forward to the appropriate person. Her email address is: Lewannick@andaras.org

Over the next month, children in different year groups will be completing national statutory tests, starting with the Year 6 SATS. We wish them good luck and remind them that this is a stepping stone to the next stage of their education and there is nothing to worry about. We know they'll all do their best.

The school council has been looking at ways to fundraise for school and shortly we will be having regular cake, ice cream and sweets sales. Please look out for notifications of these.

Have a great MayDay celebration on Monday and we look forward to seeing everyone on Tuesday

Many thanks
Sally Cook

3	95.24%	Whole School	96.35%

Fox Class Update

We've had a great couple of weeks in Fox class. Some of the work we have done in maths has been fantastic! We have been playing lots of 'games' to really practice our maths and embed our learning. We thoroughly enjoyed our PE lessons and our day of alternative sports as well. Archery was definitely the most popular of the sports! We have also been closely monitoring our seeds, that we planted with Owl class a few weeks ago, which have germinated very quickly! Seeing them grow so quickly means we're very excited to see how much they have grown each morning.

Owl Class Update

We had a fantastic day outdoors with Wild Tribe, and we are grateful to those who remembered to bring waterproofs and spare clothing. These items definitely came in handy. Our writing has been focused on creating our own story inspired by Yeti and the Bird, and I'm incredibly impressed with the children's use of various skills in their writing. In math, Year 1 has started learning about multiplication and division, while Year 2 is diving into fractions. We learned a lot from the visit by the lifeguard. During our science lesson, we went on a hunt to identify flowers and trees, learning about their common parts and even being able to name some common species.

Otter Class Update

Our Otter Class have had a great week involving lots of wildtribe and outdoor learning.

Our trip to the Woodland skills centre at Lewtrenchard on Monday was brilliant. The children had lots of fun building fires, toasting marshmallows and making wooden pendants. Then again on Tuesday, we had fun building dens and hugging trees.

We have continued to use 'The Ever changing Earth' as our hook for writing and are really beginning to apply the writing skills we have been taught throughout the year. In science and DT we continue to look at electricity and building circuits and have enjoyed investigating different materials to test if they are conductors or insulators. We are looking forward to applying this knowledge to building our torches. In computing and PSHE we have been looking at sending emails and identifying fake or scam emails as well as learning how to send emails.

In maths we have grappled with fractions in Year 3 and the pesky decimal point in Year 4. We have also been practicing our arithmetic and time tables and have really been challenging ourselves to learning the facts to recall them quickly.

Kestrel Class News

We've had an exciting week in Kestrels! In science we continued to look at classification which led us into the world of animal classification with Carl Linnaeus, providing fascinating insights into how animals are categorized. This system is still used today. Within Geography we continued our journey through deserts, uncovering the mysteries of salt pans and unique rock formations. In DT, we delved into the origins of our food, tracing its path from farm to fork. The highlight of our week was our Wild Tribe Day, where we crafted stretchers and shelters, showcasing teamwork and resilience even amidst torrential rain.
